

One of the major flaws with the current text is that one cannot right click on completed work and send to me in a file. For those students who are on campus they can more easily print their work from these activities and bring to me or use campus mail and send to me at Box 70357. Should a student live in close proximity to either Bristol or Kingsport, they might send copies of their work to the off-campus sites and ask them to get to me. But, I suspect that other students would prefer an easier way to get their work to me. It could be mailed (especially parts of activities that might be difficult to identify and explain in words). I could make allowances for those who mail directly to me. Some of you will send your work via dropbox. I realize that computer skills will vary from one student to another and try to take this into account when your work is submitted to me. If you experience a problem in submitting work to me please contact me about your problem. I can be reached via email at gunter@etsu.edu or you could leave a message on my phone at 439-4162. My office is 311 Yoakley Hall. Our Executive Aide's office is 315 Yoakley and next to her office is our Copier/Fax room, room 316 where there is a post office box for me. Work could be left here or slid under my door.

Parts of some activities require a written explanation and could be either emailed to me or put in dropbox. For example, Activity 1 and 2, Chapter 1, could easily be answered this way (or printed out and brought to me for those who are on campus). For Chapter 2, Activity 1, one could for Q. 1.1 answer a portion of it and I would know that you had the complete answer on screen. For chapter 3, Activity 1, and Q. 1.1, one could answer in part or the whole. For example, if printing out the entire document, one could answer all and get to me, but for emailing or dropbox, one could select every 3/4 years and identify the data. For Chapter 4, Activity 1, print it out if you can get to me easily, but again for those who live further away then email or put into dropbox some answers for selected states (again using Tennessee) and I will know that you did the work.

Basically, try to give me enough information from the site (of these activities) that tells me that you did the work. Another possibility might be to complete as much of the work via email or dropbox and inform me that you will mail printed copies of work for maps, spread sheets, etc. perhaps for two or more different activities from different chapters. There would be no deductions for work that is after the due date, if you informed me that part of an activity would be forthcoming along with other partial activities at a later date. I just want to make the process of getting your work to be as seamless as possible. If you have questions about what I said, please contact me at gunter@etsu.edu
