

Database Fundamentals

9.26.11

Page 1

- Homework 3 due Oct. 10
- dual table is used as a dummy table
used to return anything you want
- $\text{nl}(test, value)$ if test is null, display value
- $\text{null2}(test, val1, val2)$ if not null, $val1$; null, $val2$
- order by ... nulls first; - nulls appear first
- use || as concat
-
