

DB - HW 6 Review

Monday, December 5 2011, 9:35 AM

`select * FROM dict;`

Tables that you have created - USER_TABLES

Tables, views, or other things that you created - USER_OBJECTS

Tables you have access to - ALL_TABLES

USER_ pertains to the current user

ALL_ pertains to what you have access to

DBA_ which we don't have access to

Data dictionary can be used to find information about anything you need to know - tables, views, access rights, etc.
