

1. Either login in or create an Account at <http://www.oracle.com/index.html>:

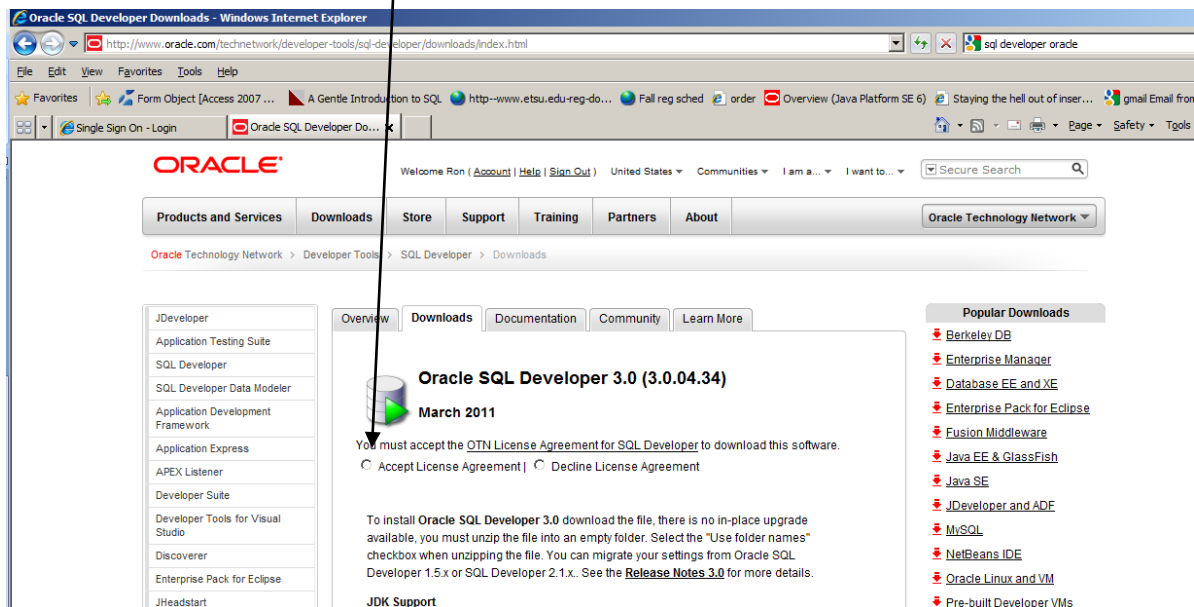

2. Please go to : <http://www.oracle.com/technetwork/developer-tools/sql-developer/overview/index.html>

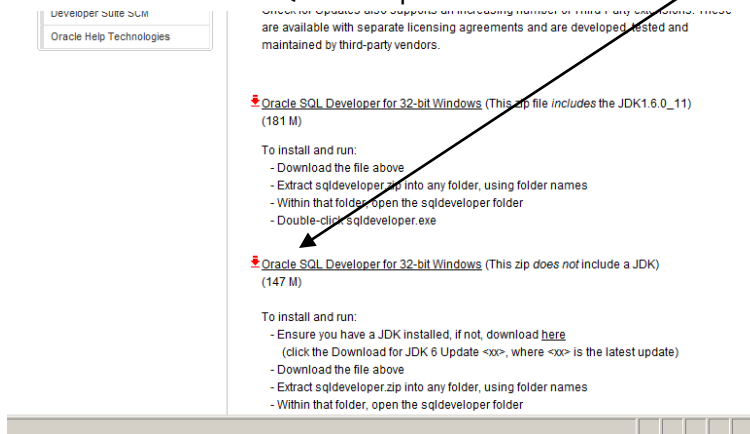

3. Click on the Downloads tab

4. Accept the License Agreement

5. Download the Oracle SQL Developer for 32-bit Windows

6. Extract this file into a directory (preferably a jump drive, for portability).
7. To install and run:
 - a. Extract sqldeveloper.zip into any folder, using folder names
 - b. Within that folder, open the sqldeveloper folder
 - c. Double-click sqldeveloper.exe
8. If SQLDeveloper requests the java location, browse through your c: drive go to C:\Program Files (x86)\Java\jdk1.6.0_20\bin and select the java.exe file (note your version of java may be different, but make sure it is jdk1.6 or higher)

9. After starting SQLDeveloper, add a new connection and fill in the following fields:

New / Select Database Connection

Connection Name	Connection Details
josh	whitlock@//pythia....
pythia@etsu.edu	zucker@//pythia.et...

Connection Name: MyConnection
Username: zabc123
Password: *****
☐ Save Password

Oracle Access

Connection Type: Basic Role: default

Hostname: pythia.etsu.edu
Port: 1521
☒ SID: csdb
☐ Service name

☐ OS Authentication ☐ Kerberos Authentication ☐ Proxy Connection

Status :

Help Save Clear Test Connect Cancel

10. Once you have connected to the database, you may now enter queries see example below:

Oracle SQL Developer - pythia@etsu.edu

File Edit View Navigate Run Versioning Tools Help

Connections x Reports x

Query Builder

select sysdate from dual;

Green triangle

Enter your query here, **do not hit return**, then either click on the green triangle or hit control-enter

Query Result x

All Rows Fetched: 1 in 0.015 seconds

SYSDATE
1 31-AUG-11

Results appear here
