What We Can Do So Far:

- ☒ Add Students
- ☐ Add Classes
- ☒ Add Tutors
- ☒ Add Faculty

- ☒ Student can submit problem
- ☐ Problem goes to Tutor

-Student needs to update problem description instead of tutor notes
-Need to view history of a problem
-If you login as tutor, it switches to the faculty menu on some clicks - need to fix - viewFaculty is page that does it

Presentation

Intro by Shawn
Student by Brandon
Tutor by Chris
Faculty by Shawn

-MenuHTML - fixed

What's Left To Fix

-addClasses.jsp so that a drop down will work for the teacher
-have classID generated by the database on addClasses.jsp
-when setting up user, Classes need to be shown and chosen

-We will use JSP
-When logging in, Faculty, Tutor, Student

- ☒ Create STUDENTCLASSES table

-Student submits ticket
-see open/closed tickets
-cancel a ticket
-a ticket update field

- Tutor
- see tickets have been assigned
- ticket update field is added

- Faculty
- view tickets, sort on different classes
- administrative functions - add student, add tutor, add faculty

Login
Goes to specific screen
Logout clears session

If there isn't a session, send the user back to the login page
